#### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

## **Management Discussion of Fund Performance**

June 7, 2018

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended March 31, 2018, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

## Investment Objective and Strategies

The Fund seeks a steady flow of income, while preserving capital and maintaining liquidity, by investing mainly in money market securities, Canadian bonds with maturities of up to one year, floating-rate notes and asset-backed securities. The Fund seeks to maintain a constant net asset value of \$10 per security.

#### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for short-term investors looking for a money market fund to hold as part of their portfolio who have a low tolerance for risk.

## Results of Operations

#### **Investment Performance**

The performance of the Fund's Series SC and Series LB securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the year, the Fund's Series SC securities returned 0.2%, and Series LB securities returned 0.5% (after deducting fees and expenses paid by the series). This compares with the FTSE TMX Canada 91-Day T-Bill Index return of 0.8%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in the index without incurring fees, expenses and commissions, which are not reflected in the index returns.

The Canadian bond market lagged the broader global bond market during the year. After raising its policy rate three times in response to robust economic data, the Bank of Canada put further increases on hold amid uncertainty prompted by threatened U.S. tariffs and a slowdown in household borrowing. The Canadian yield curve flattened as yields on shorter- and medium-term bonds rose significantly relative to longer-term bonds.

At March 31, 2018, the current yield was 0.23% for Series A; 0.19% for Series AR; 0.96% for Series ARG; 0.95% for Series C; 0.22% for Series DA; 0.99% for Series E; 0.66% for Series F and Series FB; 0.63% for Series G; 0.89% for Series GP; 0.59% for Series I; 1.51% for Series 0 and Series PWX; 0.50% for Series PW; 0.77% for Series PWF; 0.75% for Series PWFB, Series SP and Investor Series; 1.52% for Series R; 0.51% for Series SC; 0.76% for Series LB; 0.93% for Series LG; 0.90% for Series LP; and 0.78% for Series LW securities of the Fund. Yields on 91-day treasury bills rose to 1.10% from 0.55% over the year.

The flat performance of the Fund reflects the extremely low interest rates available in the marketplace, as well as Mackenzie's decision to temporarily waive a portion of its fees and expenses that would have otherwise resulted in negative performance. The portfolio management team's strategy does not focus on trying to time interest rate changes but rather on maximizing the yield of the holdings while minimizing the default risk. As a result, the Fund's portfolio was invested primarily in short-term investment grade corporate bonds and provincial short-term discount notes.

Over the year, portfolio activity and market effect resulted in new exposure to provincial short-term discount notes, increased exposure to corporate bonds and Canadian term deposits, and decreased exposure to bearer deposit discount notes, federal short-term discount notes and securitized paper discount notes.

#### **Net Assets**

The Fund's NAV increased by 23.6% to \$587.7 million at March 31, 2018, from \$475.4 million at March 31, 2017. This change was composed primarily of \$2.6 million in net income (including interest income) from investment performance, after deducting fees and expenses, \$110.9 million in net sales, and \$1.2 million in cash distributions.

See *Other Related Party Transactions* for the percentage of the Fund's NAV owned by Mackenzie and funds managed by Mackenzie. As a result of these investments, the Fund is subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors.

## Fees and Expenses

The management expense ratio ("MER") for Series SC of 0.97% during the year ended March 31, 2018, was slightly higher than the MER of 0.95% for the year ended March 31, 2017. The MER for Series LB of 0.76% during the year ended March 31, 2018, was unchanged from the MER for the year ended March 31, 2017. The MERs (before and after waivers or absorptions, if any) for each series are presented in the *Financial Highlights* section of this report. The MERs after waivers or absorptions for Series A, Series AR and Series DA increased due to Mackenzie decreasing waivers on management fees and/or administration fees. Mackenzie may discontinue the practice of absorbing management fees and/or administration fees at any time without prior notice to investors. The MER for Series GP increased due to an increase in fund costs.

## Recent Developments

The portfolio management team believes there is some uncertainty as to whether the U.S. Federal Reserve, under new chair Jerome Powell, will be sensitive to market volatility in its messaging and actions. The market continues to anticipate two to three more increases in the federal funds rate in 2018. With U.S. economic growth likely to remain solid, the team believes the Federal Reserve will pursue this path unless volatility increases or economic data is disappointing. In Canada, the team believes growing business confidence strengthens the case for another policy rate increase in July.

If more rate increases occur in either the United States or Canada, the team expects the yield curve to continue flattening as shorter-term yields rise.

On March 28, 2018, Mackenzie announced that Mackenzie Private Canadian Money Market Pool will merge into the Fund effective on or about July 6, 2018. This merger was approved by the Mackenzie Funds' Independent Review Committee. On June 22, 2018, investors in Mackenzie Canadian Money Market Class will vote on merging into the Fund. This second proposed merger, which would be effective on or about July 6, 2018, is also subject to the receipt of regulatory approvals. Mackenzie does not consider either merger to be a material change from the Fund's perspective.

Effective June 1, 2018, Series E and Series PWF securities were consolidated into Series F securities.

## Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

### **Management and Administration Services**

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation* and *Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not otherwise included in management fees. See also *Management Fees*.

## **Other Related Party Transactions**

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. At March 31, 2018, funds managed by Mackenzie owned 44.6% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

At March 31, 2018, Mackenzie had an investment of 0.6 million in the Fund 0.1% of the Fund's NAV).

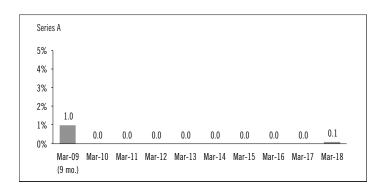

### **Past Performance**

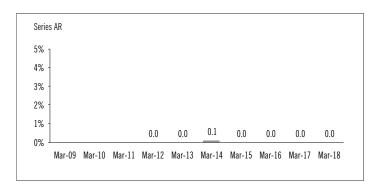

The Fund's past performance information is presented in the following charts. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax adviser regarding your personal tax situation.

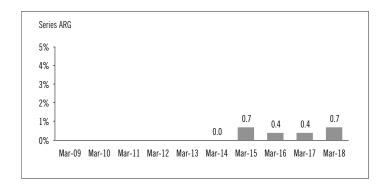

## Year-by-Year Returns

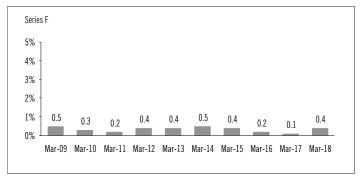

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the Notes to Financial Statements.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

LBC Financial Services Inc. ("LBC") is the principal distributor for the LBC series securities of the Fund (as listed under *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to Mackenzie. Under this arrangement, LBC was entitled to approximately 25% of the total management fees that Mackenzie received from the LBC series of all Mackenzie funds during the year. Mackenzie is responsible for paying all distribution-related payments to LBC-authorized dealers whose clients invest in the LBC series of the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 37% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series.

## **Fund Formation and Series Information**

The Fund may have undergone a number of changes, such as a reorganization or a change in manager, mandate or name. A history of the major changes affecting the Fund in the last 10 years can be found in the Fund's Annual Information Form.

Date of Formation January 4, 1991

## Fund Formation and Series Information (cont'd)

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option, various low-load purchase options and a no-load purchase option. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
