# Annual Management Report of Fund Performance

For the Year Ended March 31, 2018

This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You may obtain a copy of the annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR website at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. Every effort has been made to ensure that the information contained in this report is accurate as of the dates indicated in the report; however, the Fund cannot guarantee the accuracy or the completeness of this material. For more information, please refer to the Fund's Simplified Prospectus, Annual Information Form and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.

For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.

#### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

# **Management Discussion of Fund Performance**

June 7, 2018

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments during the period ended March 31, 2018, that have affected the Fund's performance and outlook. If the Fund was established during the period, "period" represents the period from inception to the end of the fiscal period. For information on the Fund's longer-term performance, as applicable, please refer to the *Past Performance* section of the report. In this report, "Mackenzie" refers to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

## Investment Objective and Strategies

The Fund seeks long-term capital growth by investing primarily in equities of U.S. companies of any size. The Fund uses a growth style of investing. It may invest up to 30% of its assets in non-U.S. issuers.

#### Risk

The risks of the Fund remain as discussed in the Fund's Simplified Prospectus.

The Fund is suitable for medium- to long-term investors looking for a U.S. equity fund to hold as part of their portfolio, who can handle the volatility of stock markets and who have a medium tolerance for risk.

### Results of Operations

#### **Investment Performance**

The performance of the Fund's Series A and Quadrus Series securities is discussed below. The performance of all series is shown in the *Past Performance* section of the report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series.

During the year, the Fund's Series A securities returned 15.4%, and Quadrus Series securities returned 15.3% (after deducting fees and expenses paid by the series). This compares with the S&P 500 Index return of 10.4%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in the index without incurring fees, expenses and commissions, which are not reflected in the index returns.

U.S. equity markets were generally strong earlier in the year. In December, the Trump administration signed off on tax-reform measures expected to provide fiscal stimulus. Strong market performance was disrupted in January as solid wage growth signalled rising inflation. Markets interpreted this as a sign that the U.S. Federal Reserve would continue to raise the federal funds rate. Coupled with concerns about global trade tensions, this led to increased volatility, and markets declined from earlier highs.

Within the S&P 500 Index, information technology, financials and consumer discretionary were the strongest sectors in Canadian dollar terms, while telecommunication services, consumer staples and energy were the weakest.

The Fund outperformed the index primarily because of stock selection and an overweight position in the information technology sector. Conversely, stock selection in the energy sector detracted from performance.

The Fund partially hedged its non-U.S. currency exposure back to the U.S. dollar, which detracted slightly from absolute performance as most currencies held in the Fund appreciated relative to the U.S. dollar.

Over the year, portfolio activity and market effect resulted in increased exposure to the Netherlands and China, decreased exposure to the United States and the elimination of exposure to Canada. At the sector level, exposure to information technology, consumer discretionary and real estate increased, while exposure to energy, consumer staples and materials declined. Changes to the portfolio included the elimination of the position in Johnson Controls International PLC.

#### **Net Assets**

The Fund's NAV increased by 33.2% to \$532.7 million at March 31, 2018, from \$399.8 million at March 31, 2017. This change was composed primarily of \$72.5 million in net income (including dividend and interest income) from investment performance, after deducting fees and expenses, and \$60.4 million in net sales.

See Other Related Party Transactions for the percentage of the Fund's NAV owned by Mackenzie, affiliates of Mackenzie and funds managed by Mackenzie. As a result of these investments, the Fund is subject to large transaction risk as discussed in the Prospectus. Mackenzie manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions. At March 31, 2018, Mackenzie had received no such notices.

### **Fees and Expenses**

The management expense ratio ("MER") for Series A of 2.54% during the year ended March 31, 2018, was unchanged from the MER for the year ended March 31, 2017. The MER for Quadrus Series of 2.64% during the year ended March 31, 2018, was slightly lower than the MER of 2.65% for the year ended March 31, 2017. The MERs (before and after waivers or absorptions, if any) for each series are presented in the *Financial Highlights* section of this report.

### Recent Developments

The portfolio management team has a generally positive outlook on equities across the geographies in which the Fund invests, particularly the United States. The synchronized global economic recovery continues, gross domestic product growth is accelerating to over 3% and corporate tax rates are moving lower, providing incentives for capital spending. In addition, unemployment remains historically low, with signs of wage growth, and central banks are largely maintaining accommodative monetary policies. However, the team is also aware that the economic cycle is entering its later stages, inflationary forces are starting to appear and there are some

regulatory risks, specifically around mega-cap information technology firms, which led equity markets throughout 2017. The rhetoric around trade tariffs and policy is also an area of focus, and the team believes many of the goods and transport producers held by the Fund will face input cost inflation.

Effective June 1, 2018, Series PWF securities were consolidated into Series F securities.

## Related Party Transactions

The following arrangements result in fees paid by the Fund to Mackenzie or to companies affiliated with the Fund.

### **Management and Administration Services**

For each applicable series, the Fund paid management fees and administration fees to Mackenzie at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, Mackenzie pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not otherwise included in management fees. See also *Management Fees*.

## **Other Related Party Transactions**

Investment funds managed by Mackenzie invest in Series R securities of the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. Series S securities are also issued on a prospectus-exempt basis to London Life Insurance Company, The Great-West Life Assurance Company and The Canada Life Assurance Company (collectively, the "Related Insurance Companies"), all of which are companies affiliated with Mackenzie. At March 31, 2018, the Related Insurance Companies owned 51.6% of the Fund's NAV, and funds managed by Mackenzie owned 15.4% of the Fund's NAV. All related party transactions are based on the NAV per security on each transaction day.

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions.

At March 31, 2018, Mackenzie had an investment of \$4,979 in the Fund (less than 0.1% of the Fund's NAV).

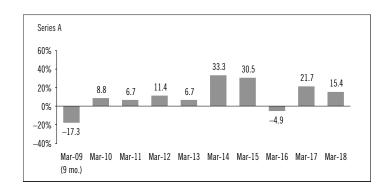

### **Past Performance**

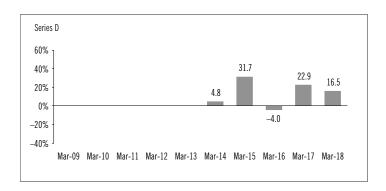

The Fund's past performance information is presented in the following charts and table. It assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The charts and table do not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor that would have reduced returns. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax adviser regarding your personal tax situation.

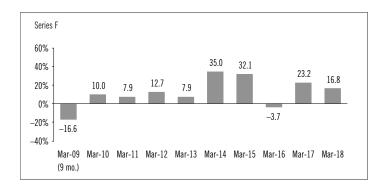

### Year-by-Year Returns

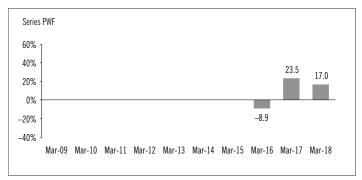

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

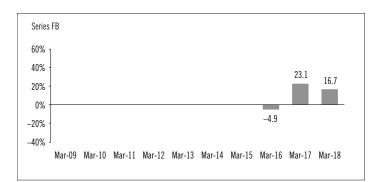

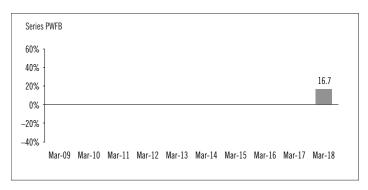

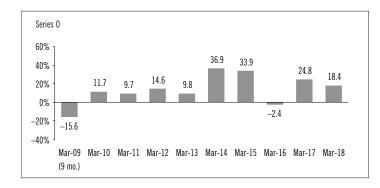

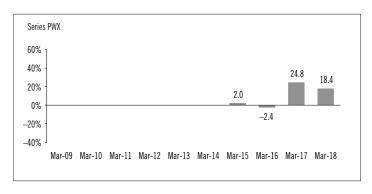

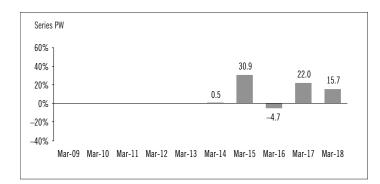

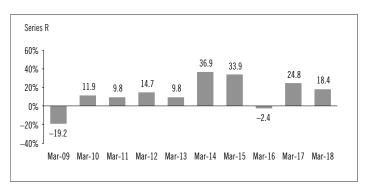

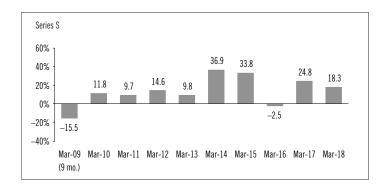

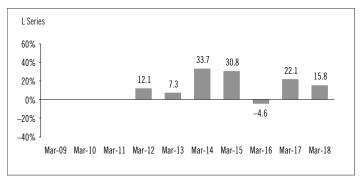

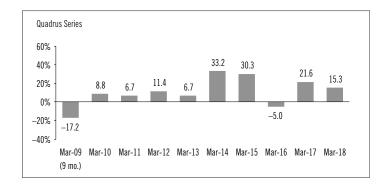

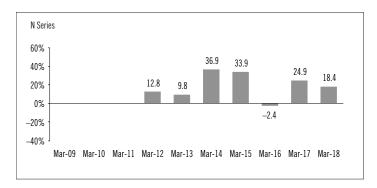

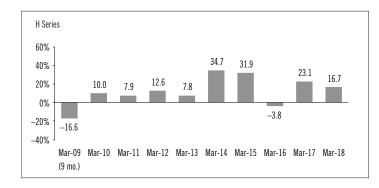

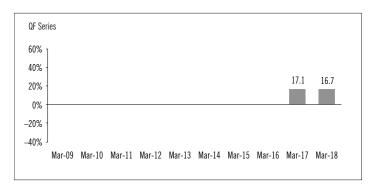

## **Annual Compound Returns**

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2018. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all distributions are reinvested.

The S&P 500 Index is a market capitalization weighted index of 500 widely held securities, designed to measure broad U.S. equity performance.

<sup>(1)</sup> The percentage return differs for each series because the management fee rate and expenses differ for each series.

<sup>(2)</sup> The return since inception for each series will differ when the inception date differs and is only provided when a series has been active for a period of less than 10 years.

<sup>(3)</sup> The return of the S&P 500 Index since inception for each applicable series is as follows: Series D 16.5%, Series FB 11.9%, Series PW 16.3%, Series PWF 10.4%, Series PWFB 9.9%, Series PWX 11.1%, Series R 12.5%, L Series 19.5%, N Series 19.5%, QF Series 14.2%.

- (1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences can be found in the Notes to Financial Statements.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. If in the period a series was established or reinstated, the management expense ratio is annualized from the date of inception or reinstatement. Mackenzie and Quadrus may waive or absorb operating expenses at their discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by Mackenzie in part to pay Putnam Advisory Company LLC, an affiliate of Mackenzie, for investment advisory services, including managing the investment portfolio, providing investment analysis and recommendations, making investment decisions and making brokerage arrangements for the purchase and sale of the investment portfolio. Mackenzie also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

Quadrus Investment Services Ltd. ("Quadrus"), an affiliate of Mackenzie, is the principal distributor for the Quadrus series securities of the Fund (as listed in the *Fund Formation and Series Information*) and receives a portion of the management fees that the Fund pays to Mackenzie. Under this arrangement, Quadrus was entitled to approximately 79% of the total management fees that Mackenzie received from the Quadrus Group of Funds during the year. As the principal distributor of the Quadrus series securities of the Fund, Quadrus is responsible for paying certain administrative costs and all distribution-related payments to registered dealers whose clients invest in those securities of the Fund.

The following dealers affiliated with Mackenzie may be entitled to distribution-related payments from Mackenzie on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation and Investors Group Financial Services Inc.

Mackenzie used approximately 43% of the total management fee revenues received from all Mackenzie funds during the year to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 45% of the management fees paid by all applicable series of the Fund during the year. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series. The higher proportion of distribution-related payments is primarily attributable to sales commissions related to gross sales of redemption charge securities of the Fund.

An investor in the Fund may choose among different purchase options that are available under each series. These purchase options are a sales charge purchase option, a redemption charge purchase option, various low-load purchase options and a no-load purchase option. The charges under the sales charge purchase option are negotiated by investors with their dealers. The charges under the redemption charge and low-load purchase options are paid to Mackenzie if an investor redeems securities of the Fund during specific periods. Not all purchase options are available under each series of the Fund, and the charges for each purchase option may vary among the different series. For further details on these purchase options, please refer to the Fund's Simplified Prospectus and Fund Facts.
